# Trust The Water Experts® to Save You Money!

Your local Culligan® Water Expert works as your partner to determine the correct pretreatment process. Starting with a water analysis and your system's requirements, Culligan can offer you treatment options suited specifically for your needs.

Water Need	Culligan Water Solutions
<b>Make-up water for boilers or cooling towers</b> <b>Facility use potable water (restrooms, etc.)</b>	Reduce utility bills and increase equipment life span Save money on chemicals while lowering maintenance and operating costs <i>"Even on small boilers, the prevention of scale formation can produce substantial energy savings."</i> "Energy Tip Sheet # 7," U.S. Department of Energy
<b>Laundries</b>	Reduce labor and maintenance costs and increase equipment life span Give you brighter-whiter-softer linens Save on detergent use while increasing textile life <i>"After installing the Culligan® water softener, the linens were coming out cleaner and the cost of the chemicals came down. Our savings were between 25% and 35%."</i> General Manager, Regional Hotel Chain, Washington
<b>Ice &amp; Vending Machines</b>	Make better ice cubes and drinks Reduce utility bills and increase equipment life span Lower maintenance and operating costs <i>"Water filters are used to increase the operating life and productivity of the machines. If the inside of the machine is loaded with scale build-up, it can affect the water distribution over the ice-making portion of the machine, losing efficiency."</i> Hotel & Motel Management Magazine*
<b>Drinking water for food service operations</b>	Provide pure drinking water that exceeds EPA requirements Gives you an endless supply of great tasting water Saves costs with the option of simplified billing Option of Bottled Water, Point-of-Use, or a centralized source RO system <i>"Culligan® water is a large contributing factor to our coffee's quality and success."</i> Owner, Coffee-house, Castle Rock, CO
<b>Food Service</b>	Reduce utility bills and increase equipment life span Save money on soaps and chemicals while lowering maintenance and operating costs Reduce labor costs Give you brighter-whiter-softer linens Save on detergent use, make cleaning easier and have spot-free tableware Get better tasting food and beverages <i>"Not only does the Culligan® softener prevent our tableware from spotting, it also saves us anywhere from 30-45% on soap usage per month."</i> Manager, Independent Restaurant, Denver, CO

So, whether you operate a full-service or limited service facility, Culligan has the right mix of water treatment solutions.

# The Culligan® Difference

## Quality

Since 1936, Culligan International Company has been the innovator in water treatment. Under an ISO 9001 certified quality system, Culligan manufactures our own equipment. In fact, no other water treatment company holds as many patents as Culligan.

## Local Responsive Service

You can always count on Culligan for professional service and support whenever you need it.

## Factory-Trained Service Technicians

Extensive training makes your local Culligan® service technician the expert in maintaining the equipment to operate at peak efficiency.

## Manufacturer-Direct Replacement Parts

You can trust that the replacement parts will be what you need when you need it.

Our customers say it best:

"My Culligan salesman has helped me with our company's needs financially, promptly and has had great solutions to issues with our water and has always been timely. He makes Culligan one of our best vendors to deal with and he still drops by or calls to make sure our water and our business is doing well."

*Owner, Coffee-house, Castle Rock, CO*

## Culligan of Rockford keeps it simple and efficient for the Best Western Clock Tower Resort & Conference Center

Built in 1967, the Best Western Clock Tower Resort & Conference Center in Rockford, Illinois needed to upgrade its use of water in addition to reducing the hardness level. Culligan of Rockford helped them do both with the installation of a new water softening system comprised of a pair of water softening tanks.

Providing up to 250 gallons of flow per minute, the system utilizes both Culligan's MVP™ controller and brine-reclaim options. With both the controller and reclaim in place, salt usage dropped to almost half of its previous level from 4,800 lbs. to 2,800 lbs. per month. The MVP™ provides the advantage of progressive flow control allowing the use of a smaller system to meet their peak flow rates only when needed. This simple solution to the varying water usage demands of the resort has made Culligan a supplier the resort relies on.

With weekly salt delivery, quality checklists, and maintenance, Culligan of Rockford keeps the system running efficiently and maintains a quality water supply for the entire operation of the resort including their guestrooms, laundry, restaurant, nightclub, and conference center.

## Culligan® Product Applications

Application	Filtration	Softening	Deionization	Reverse Osmosis	Point-of-Use Filtration	Bottled Water
Make-up water for boilers						
Cooling towers						
Facility Use (potable water)						
Laundries						
Ice Machines						
Vending Machines & Fountain Service						
Drinking water						
Foodservice						

## *Business Comes Full Circle With Culligan*

### **Local Service You Can Depend On**

Trust the Water Experts® for local continuing service after the sale with over 800 dealers in the US and Canada. As your partner, your local Culligan Man® is there for you after installing the equipment, with a regular service plan to make sure that the Culligan® equipment operates at peak efficiency.

### **Product Innovation and Technical Expertise**

Since 1936, Culligan has been the leader in product innovations with our products proudly made in the USA under an ISO 9001 quality system. Extensive factory training gives your local Culligan® service technician the expertise to properly install, service, and maintain your equipment.

### **Water Testing Analysis**

Your local *Culligan* Commercial Expert can test your water through our very own NELAP\* Accredited Analytical Laboratory. Committed to quality and service, Culligan's lab uses EPA approved methods for the highest quality water analysis available. Even after the initial water analysis to determine the correct pretreatment method, regular water testing can monitor any changes in water conditions that might affect equipment or operations.

### **Water Done Right Every Time**

Your local *Culligan* Commercial Expert can provide you with an AutoCAD compatible CD-ROM. In addition to specific product specifications, the CD-ROM includes our exclusive CAAP® program. With CAAP, your *Culligan* expert or a specifying engineer can input your exact water conditions and operating parameters to correctly size and select the equipment you need.

**Just say “Hey Culligan Man!”®**
